TROPICAL CYCLONE BULLETIN NO. 13 Typhoon "ODETTE"

Issued at 8:00 PM, 16 December 2021 Valid for broadcast until the next bulletin at 11:00 PM today

TYPHOON "ODETTE" SLIGHTLY WEAKENS AND IS NOW TRAVERSING THE NORTHERN PORTION OF BOHOL.

Location of Center (7:00 PM)

The center of the eye of Typhoon "ODETTE" was located based on all available data including those from Guiuan, Mactan, and Bohol Doppler Weather Radar over the coastal waters of Pres. Carlos P. Garcia, Bohol (10.1°N, 124.5°E)

Intensity

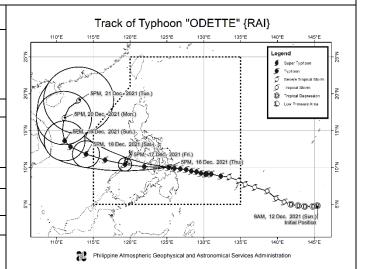

Maximum sustained winds of 185 km/h near the center, gustiness of up to 255 km/h, and central pressure of 925 hPa

Present Movement

Westward at 30 km/h

Extent of Tropical Cyclone Winds

Strong winds or higher extend outwards up to **480 km** from the center

TRACK AND INTENSITY FORECAST

	Center Position				sity	Movement
Date and Time	Lat. (°N)	Lon. (°E)	Location	MSW (km/h)	Cat.	dir. and speed (km/h)
12-Hour Forecast 5:00 AM 17 December 2021	10.1	121.9	100 km Southwest of Iloilo city, Iloilo	165	TY	W 30
24-Hour Forecast 5:00 PM 17 December 2021	10.4	119.3	In the vicinity of Roxas, Palawan	155	TY	W 25
36-Hour Forecast 5:00 AM 18 December 2021	11.0	116.6	275 km East of Pag-asa Island, Kalayaan, Palawan	155	TY	WNW 25
48-Hour Forecast 5:00 PM 18 December 2021	11.8	114.0	Over the coastal waters of Pag-asa Island, Kalayaan, Palawan (outside the PAR)	165	TY	WNW 25
60-Hour Forecast 5:00 AM 19 December 2021	12.8	111.9	310 km Northwest of Pag-asa Island, Kalayaan, Palawan (outside the PAR)	155	TY	WNW 20
72-Hour Forecast 5:00 PM 19 December 2021	13.6	111.1	435 km Northwest of Pag-asa Island, Kalayaan, Palawan (outside the PAR)	140	TY	NW 10
96-Hour Forecast 5:00 PM 20 December 2021	16.7	111.0	1,000 km West of Northern Luzon (outside the PAR)	95	STS	N 15
120-Hour Forecast 5:00 PM 21 December 2021	19.1	113.0	890 km West of Extreme Northern Luzon (outside the PAR)	65	TS	NE 15

TROPICAL CYCLONE BULLETIN NO. 13 Typhoon "ODETTE"

Issued at 8:00 PM, 16 December 2021 Valid for broadcast until the next bulletin at 11:00 PM today

HAZARDS AFFECTING LAND AREAS

Heavy Rainfall

- Tonight through tomorrow early morning: Heavy to torrential rains over Central Visayas, Misamis Oriental, Camiguin, Bukidnon, Southern Leyte, and Negros Occidental. Moderate to heavy with at times intense rains over Leyte, the southern portions of Eastern Samar and Samar, Zamboanga del Norte, Lanao del Sur, and the rest of Northern Mindanao. Light to moderate with at times heavy rains over Bicol Region, Quezon, and the rest of Visayas, the rest of Zamboanga Peninsula, Davao Oriental, Davao de Oro, Davao del Norte, and mainland Bangsamoro.
- Tomorrow early morning through Saturday early morning: Heavy to intense with at times torrential rains over Negros Oriental, Western Visayas, and Palawan including Calamian Islands, Cuyo, and Cagayancillo Islands. Moderate to heavy with at times intense rains over Bicol Region, Zamboanga Peninsula, Quezon, Occidental Mindoro, Oriental Mindoro, Romblon, Marinduque, Lanao del Norte, Lanao del Sur, and the rest of Visayas. Light to moderate with at times heavy rains over Caraga, the southern portion of Aurora, and the rest of Northern Mindanao.
- Saturday early morning through Sunday early morning: Heavy to torrential rains over Kalayaan Islands. Light to moderate with at times heavy rains over Cagayan Valley, Aurora, Quezon, mainland Palawan and Calamian Islands.
- Under these conditions, scattered to widespread flooding (including flash floods) and rain-induced landslides
 are expected especially in areas that are highly or very highly susceptible to these hazard as identified in hazard
 maps, and in localities with significant antecedent rainfall.

Severe Winds

- Winds may reach typhoon strength up to 185 km/h in strength within any of the areas where TCWS #4 is hoisted during the passage of the typhoon. This may cause generally heavy to very heavy damage to structures and vegetation.
- Destructive typhoon-force winds will be experienced within any of the areas where TCWS #3 is in effect. This may bring moderate to heavy damage to structures and vegetation.
- Damaging winds reaching gale- to storm-force strength will be experienced within any of the areas where TCWS #2 is in effect. This may result in generally light to moderate damage to structures and vegetation.
- Strong winds (strong breeze to near gale) with higher gusts will be experienced within any of the areas where TCWS #1 is currently in effect during the passage of the typhoon. This may generally bring up to very light damage to structures and vegetation.

Coastal Inundation

There is a **moderate to high risk of storm surge** of up to 3.0 m in height which may cause life-threatening flooding in the low-lying coastal areas of Central Visayas, Iloilo, Guimaras, Negros Occidental, Southern Leyte, Dinagat Islands, Surigao del Norte, Surigao del Sur, Agusan del Norte, and several localities in the northern portion of Palawan including Calamian, Cuyo and Cagayancillo Islands, Antique, the southern portions of Samar and Eastern Samar, Leyte, and Misamis Oriental. For more information, refer to Storm Surge Warning #5 issued at 2:00 PM today.

HAZARDS AFFECTING COASTAL WATERS

- In the next 24 hours, moderate to very high seas (1.2 to 12.0 m) will be experienced over the seaboards of areas where TCWS is in effect (especially in the open sea areas). These conditions are risky for all types of sea vessels. Mariners are advised to remain in port or take shelter in port until winds and waves subside.
- Under the influence of Typhoon "ODETTE" and the prevailing Northeast Monsoon, a Gale Warning remains in
 effect for several coastal waters not under any wind signal, specifically the seaboards of Northern Luzon, and the
 eastern seaboards of Central and Southern Luzon. For more information, refer to Gale Warning #50 issued at 5:00
 PM today.
- In the next 24 hours, moderate to rough seas (1.2 to 3.1 m) will also prevail over the remaining seaboards of the country that are not under any wind signal. **These conditions are risky for those using small seacrafts.** Mariners are advised to take precautionary measures when venturing out to sea and, if possible, avoid navigating in these conditions.

Checked by: JSG

TROPICAL CYCLONE BULLETIN NO. 13 Typhoon "ODETTE"

Issued at 8:00 PM, 16 December 2021 Valid for broadcast until the next bulletin at 11:00 PM today

TRACK AND INTENSITY OUTLOOK

- Recent Landfall: Padre Burgos, Southern Leyte (5:40 PM); Pres. Carlos P. Garcia, Bohol (6:30 PM); Bien Unido, Bohol (7:30 PM)
- On the forecast track, "ODETTE" will continue moving westward and the center of the tropical cyclone will cross several provinces in Central and Western Visayas regions before emerging over the Sulu Sea tomorrow morning. After passing near or in the vicinity of either Cuyo or Cagayancillo archipelago, "ODETTE" is forecast to cross the northern or central portion of Palawan tomorrow afternoon before emerging over the West Philippine Sea.
- "ODETTE" may see some slight weakening as it crosses Visayas and Palawan, but it is forecast to remain as a typhoon. Re-intensification is likely once "ODETTE" emerges over the West Philippine Sea. However, weakening may ensue beginning Saturday evening or Sunday as the typhoon becomes exposed to increasing vertical wind shear and the surge of the Northeast Monsoon.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.

The next tropical cyclone bulletin will be issued at 11:00 PM today.
